Working Smarter *with AI*

*Using ChatGPT & Claude to cut busywork and reclaim your time
— a hands-on 90-minute workshop*

DR. DEWAYNE A. DIXON, PHD · DEWAYNE A DIXON LLC.

OBJECTIVES

What you'll walk out *able to do*

- 01 Know what ChatGPT & Claude can and can't do.
- 02 Write strong prompts that get usable results the first time.
- 03 Draft, revise, summarize, and organize faster.
- 04 Turn a one-off prompt into a repeatable weekly workflow.
- 05 Know what should never be entered into an AI tool.
- 06 Apply ethical guardrails and keep a human in charge.
- 07 Choose the right tool (ChatGPT vs. Claude) for the task.
- 08 Leave with prompt templates you can use Monday morning.

AGENDA

Our *90 minutes*

0–10

Welcome & warm-up

10–25

Foundations: what AI is + real uses

25–50

Prompting + your turn

50–70

Build a repeatable workflow

70–82

Responsible use + the time it saves

82–90

Next steps & questions

WARM - UP

Let's get a read on *the room*

01

Who has used ChatGPT or Claude?

02

Who uses it weekly?

03

What's the #1 task that eats your time each week?

PART ONE

Foundations

What these tools are, and why they matter for your office.

THE BIG IDEA

What generative AI *actually is*

*Think of it as a brilliant, eager intern —
talented, tireless, confident, needs supervision.*

+

Has read almost everything online

Writes fast, never tires.

—

Knows nothing about your office

...unless you tell it. Will confidently make things up.

!

Never makes the final decision

You do. Always.

Common AI assistants — *what each is good at*

ChatGPT

Versatile all-rounder

Claude

Warm, careful writing

Gemini

Lives in Gmail & Docs

Copilot

Inside Word & Outlook

Perplexity

Research with cited sources

Meta AI

Free in WhatsApp & Instagram

Today we focus on two: **ChatGPT & Claude** — both free to start.

TOOL CHOICE

When to reach for *each*

ChatGPT

Quick drafts & brainstorming

Social posts & captions

Web look-ups & ideas

Images & graphics

Claude

Longer, warmer letters

Donor & stewardship notes

Summarizing long documents

Polishing & matching voice

*Not sure? Try the same prompt in **both**
— and keep the better result.*

WHY THIS MATTERS

It gives you *back time*

AI

handles the drafting
and busywork.

You

keep the judgment,
the voice, the relationships.

Your work runs on communication, relationships, events, and stewardship.

IN YOUR OFFICE

Real tasks AI can help with *today*

01

Alumni emails & save-the-dates

02

Event descriptions &
invitations

03

Meeting notes into action items

04

Follow-ups & thank-you notes

05

Donor stewardship language

06

Social media captions

07

Communication calendars

+

*And more — whatever drafting
fills your week.*

PART TWO

Prompting

The difference between a weak result and a usable one.

Before *and after*

WEAK PROMPT

"Write an alumni email."

RESULT

"Dear Alumni,

We're excited to invite you to our event. Please join us.

Best,

The Team."

Flat. Generic.

STRONG PROMPT

"You are the Morehouse alumni office. Write a warm, proud 150-word Homecoming save-the-date to alumni, one clear call to action, include a [LINK]."

RESULT

"Dear Men of Morehouse and friends,

Reconnect with your Morehouse family this Homecoming...

Save your spot: [LINK].

In the Morehouse spirit."

On-voice. Ready to use.

THE FRAMEWORK

The prompting recipe — *R · C · A · T · C*

R

Role

"You are the Morehouse alumni office..."

C

Context

What it's for. Key facts the tool needs to know.

A

Audience

Who's reading — alumni, donors, chapter leaders.

T

Tone

Warm, formal, celebratory, grateful.

C

Constraints

Length, format, one clear call to action.

+ **Iterate** — *"shorter," "warmer," "give me 3 versions."*

FOLLOW-UP PROMPTS

Power moves — *level up any draft*

" Give me 3 **versions**, different tones."

" Make it **under 120 words**."

" Make it **warmer** / **more formal**."

" **Match this voice:** *[paste a sample]*."

" Turn these **bullets** into a polished message."

Your *turn*

Write a prompt using **R-C-A-T-C** to draft **ONE** of these — then run it in ChatGPT or Claude.

A

A save-the-date for an upcoming event.

B

A thank-you note to a donor.
(use placeholders)

C

A reminder to chapter leaders.

We'll share a few out loud.

PART THREE

Workflows

From a single prompt to a repeatable system.

THE PIPELINE

Do it once. *Reuse it every week.*

One pipeline. Five steps. Every Monday morning.

Build the workflow, *live*

Using sanitized meeting notes, run the whole pipeline together in ChatGPT or Claude:

01

Summarize the meeting.

02

Pull action items and owners.

03

Draft the follow-up emails.

04

Create the calendar entries.

THE MATH OF TIME SAVED

The overhead it removes — *a simple equation*

ILLUSTRATIVE — NOT MEASURED

$$\begin{aligned} &\text{minutes saved per task} \times \text{tasks per week} \times \text{staff} \\ &= \text{hours reclaimed} \end{aligned}$$

EXAMPLE

$$\approx 5 \text{ min} \times 20 \text{ pieces/week} \times 6 \text{ staff} \approx 10 \text{ hours every week}$$

That's time back for the relationship work only people can do.

PART FOUR

Responsible Use

Guardrails and good judgment.

What stays out. *What you always do.*

NEVER ENTER

If you wouldn't email it
to a stranger, don't paste it.

-
- Student records
 - Donor financials
 - Confidential records
 - Personnel matters

ALWAYS

Draft with AI.
Decide as a human.

-
- Remove identifiers / use placeholders
 - Use AI to draft, not decide
 - Review every output for accuracy, tone, bias
 - Double-check any fact, date, name, or amount

MISSION & JUDGMENT

The human stays *in charge*

- 01 AI never makes the final call about **students, donors, alumni, or priorities.**
- 02 Human review protects the people you serve, **the office, and your judgment.**
- 03 *At a **mission-driven institution**, the human stays in charge.*

YOUR MOVE

Pick one workflow to *adopt this month*

A Meeting notes → follow-up emails

B Alumni event communications

C Post-event thank-you and recaps

D A monthly communication calendar

*Start with the task you do **most often**.*

WHAT'S IN YOUR BAG

Your take-home kit — *what you're leaving with*

01

A prompt guide

The R-C-A-T-C recipe.

02

Example prompts

For emails, events, and follow-ups.

03

A reusable workflow
template

The five-step pipeline.

04

A responsible-AI checklist

Guardrails for everyday use.

QUESTIONS & NEXT STEPS

Thank you.

*"Tell me the one task you'd most love to hand off —
let's build that workflow together."*
